Claim Rejections - 35 USC § 112

Claims 23, 28, 29, 30, 31, 33, 36-49 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Recitations such as “at least one sensor” on line 3 of claim 23 render the claims indefinite because it is unclear if the applicant is referring to the sensor set forth above or is attempting to set forth another sensor in addition to the one set forth above.

Recitations such as “the moveable member” on line 11 of claim 36 render the claims indefinite because it is unclear if the applicant is referring to the movable closure set forth above or is attempting to set forth another member in addition to the one set forth above.

Claims 20-22, 24-27, 32, 34 and 35 are allowed.

Allowable Subject Matter

The following is an examiner's statement of reasons for allowance: the prior art of record, absent applicant's own disclosure, fails to teach the entire combination of elements set forth in the claimed invention. Specifically, the prior art of record fails to teach at least one sensor located on a clutch positioned between the reversible electric motor and the movable member and selectively actuating the reversible electric motor with control means for controlling movement of the moveable member responsive to the

at least on input signal in accordance with a control program. See lines 8-13 of claim 20 and lines 9-14 of claim 32.

Claims 23, 28, 29, 30, 31, 33, 36-49 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, second paragraph, set forth in this Office action.

The following is a statement of reasons for the indication of allowable subject matter: the prior art of record, absent applicant's own disclosure, fails to teach the entire combination of elements set forth in the claimed invention. Specifically, the prior art of record fails to teach controlling the moveable member while moving between a first position and a second position along the fixed path in response to a sensor mounted to a portion of a clutch positioned between the reversible electric motor and the moveable member, the sensor for sensing movement of the clutch when the moveable member moves along the fixed path. See lines 13-17 of claim 30, lines 9-14 of claim 36 and lines 11-21 of claim 42.

Although references such as Grupp et al. and Suggs et al. disclose the use of a sensor mounted on a clutch, the prior art of record fails to disclose a sensor mounted on a clutch that is utilized to control the movement of the moveable member in accordance with a control program.

Conclusion

Art Unit: 3634

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
